Web Image Request XML Setup Requirements

TST-CF Express Web Services require authorization to our web API prior to use. Please contact edi@tst-cfexpress.com directly to obtain these codes.

Your requestor code is <requestor>EXAMPLE</requestor>.
Your authorization is <authorization>EXAMPLE</authorization>.

REQUESTOR AND AUTHORIZATION are required only if your computer connects directly to the web API for TST-CF Express. If you are using a 3rd party (for example, Banyan Technologies, Process Weaver, ShipperHQ, Project 44, etc.) you do NOT REQUIRE a web API authorization as you are connecting to their systems, nor can TST-CF Express provide support for their systems.

ONE authorization is required per company using the web API.

Customer specific login and password (via registration on the TST-CF website) are required to obtain the correct images.

Both the element and data in these items are case sensitive.

General Programming Overview

All elements are case sensitive. If casing is not correct, the system will assume the element is missing. Please add <?xml version="1.0" encoding="ISO-8859-1"?> on the first line of the XML document. All response documents will contain this prefix.

Web Service URL XML/HTTP/POST

Image Request: <https://www.tst-cfexpress.com/xml/image>

Request Document – Image Request <imagerequest>

Element	Type	Required	Max Length Nbr Elements	Description
---------	------	----------	----------------------------	-------------

<imagerequest>	Array	Yes	1	Document Name
